

# Empty bottle inspector

neu

## MINOS-RS

To the possibility to integrate micro-enterprises in very cramped conditions a complete Empty bottle inspection, we have developed this machine.

This is based on a linear motion with only 1200 mm length for the following inspections:

- ✓ Neck finish inspection
- ✓ Base inspection
- ✓ sidewall inspection 360°
- ✓ HF Caustic detection
- ✓ IR residual liquid detection

### equipment:

- ✓ Test container protocol
- ✓ Tele-service possible
- ✓ Operation via 19" Touch Screen
- ✓ lighting unit in LED-technik
- ✓ High resolution CCD-Cameras
- ✓ Integrated blow-off unit
- ✓ Rejection
- ✓ **TOP price-performance relation**

MINOS-RS

1. The conveyor lubrication has to be reduced to a minimum.
2. The smallest container to be processed determines the performance.
3. All dimensions in mm.
4. In the area of / the belt no inspection takes place.
